Customer Conversation Study Guide

Study the best response for each customer scenario. This guide is also available to read online.

01 / IN A HURRY

Customer: I'm running late. I don't want to wait in that ordering line again.

Recommended response: You can order ahead in our app and skip the ordering line.

Why it works: Lead with convenience. App ordering lets customers order ahead and skip the ordering line.

02 / FIRST-TIME VISITOR

Customer: Is there a fee to join your rewards program?

Recommended response: It’s free to join! New members can get 50% off a Classic Pearl Milk Tea after downloading the app.

Why it works: Membership is free. Introduce the new-member Classic Pearl Milk Tea offer.

03 / REGULAR CUSTOMER

Customer: I buy a drink here almost every day. Is the app worth it?

Recommended response: You earn one point per dollar, and twelve points can get you a $1 reward coupon.

Why it works: Regular customers benefit from earning points on purchases. 12 points = a $1 reward coupon.

04 / CURIOUS CUSTOMER

Customer: Where do I find special member deals?

Recommended response: Check the Rewards section in the app for member-only offers.

Why it works: The Rewards section is the right place to find member-only offers and promotions.

05 / BIRTHDAY CUSTOMER

Customer: Does being a member give me anything on my birthday?

Recommended response: Members get a birthday bonus of double points.

Why it works: The supplied program details list birthday bonus points (2× points).

06 / AFTER PURCHASE

Customer: I already paid. Is there any reason to download the app for next time?

Recommended response: You can order ahead next time and check the Rewards section for offers.

Why it works: Connect the app to the customer’s next visit: order ahead and discover rewards.

07 / POINTS QUESTION

Customer: How many points would I earn on a $7 purchase?

Recommended response: 7 points.

Why it works: At one point per $1 spent, a $7 purchase earns 7 points.

08 / REWARD VALUE

Customer: I have 24 points. What reward coupon value does that represent at the 12-point rate?

Recommended response: $2

Why it works: 24 ÷ 12 = 2, so that is $2 in reward-coupon value at the stated rate.

09 / APP SKEPTIC

Customer: I don’t want a long sales pitch. What’s the main benefit?

Recommended response: It’s free to join, and you can order ahead and earn rewards.

Why it works: Keep the pitch short, useful, and accurate. Avoid pressure or unsupported guarantees.

10 / PROMOTION QUESTION

Customer: Are member-only offers always the same?

Recommended response: There are also special offers and promotions throughout the year.

Why it works: Member-only offers and special events can change throughout the year.

11 / ORDER PICKUP

Customer: If I order in the app, can I avoid waiting to place the order in store?

Recommended response: Yes, you can order ahead and skip the ordering line.

Why it works: Order Ahead skips the ordering line, but does not guarantee instant drink preparation.

12 / POINTS VALUE

Customer: If I earn 12 points, what can I redeem according to the program?

Recommended response: A $1 reward coupon.

Why it works: The stated rate is 12 points for a $1 reward coupon.
